DETAILED ACTION

An amendment was received and entered 11/28/07.

Claims 23-25, 27-30, 32, and 34 were canceled, and claims 35-40 were added.

Claims 26, 31, 33, and 35-40 are pending and under consideration.

Rejections not reiterated are withdrawn.

This Action is NON-FINAL due to the indication in the previous Action that SEQ ID NO: 118171 was free of the prior art. Nucleic acids consisting of SEQ ID NO: 118171, are considered to be obvious for the reasons set forth below.

Oath/Declaration

The oath filed 11/28/07 overcame the previous objection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 26, 31, and 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Pfeffer et al (US 20050222067).

Application/Control Number:

10/709,739 Art Unit: 1635

Pfeffer taught SEQ ID NO: 82 which is identical to instant SEQ ID NO: 4204050. See Table A2 at page 5 of Pfeffer. Pfeffer also taught vectors comprising SEQ ID NO: 82. See paragraphs 31-33 and claims 70 and 72. Note that SEQ ID NO: 82 is considered to be a probe comprising the sequence of instant SEQ ID NO: 4204050, as are the vectors of '067 claims 70 and 72.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 35-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pfeffer et al (US 20050222067).

Pfeffer taught SEQ ID NO: 82 which is identical to instant SEQ ID NO: 4204050. See Table A2 at page 5 of Pfeffer.

Pfeffer did not explicitly teach a sequence consisting of instant SEQ ID NOS: 117937 or 118171. However, Pfeffer did explicitly disclose instant SEQ ID NO: 4204050, which comprises instant SEQ ID NOS: 117937 or 118171, and Pfeffer also fairly taught isolated molecules comprising 10-50 bases of SEQ ID NO: 82, and vectors comprising these sequences. See paragraphs 17, 18, and 31-33.

It would have been obvious to one of ordinary skill in the art at the time of the invention to make any 10-50 base fragment of SEQ ID NO: 82 of Pfeffer for use as an

Application/Control Number:

10/709,739 Art Unit: 1635

inhibitory RNA molecule because Pfeffer makes this suggestion at paragraphs 17 and 18. Further Pfeffer discloses a 22-base fragment that differs from instant SEQ ID NO: 117937 by beginning and ending 1 base earlier in the sequence of SEQ ID NO: 82 than does instant SEQ ID NO: 117937 (see the first sequence disclosed in Table A2, i.e. SEQ ID NO: 71), so it is clear that one of ordinary skill would have considered 22 base fragments of SEQ ID NO: 82 as inhibitory RNA molecules. In so doing one would have arrived at all forty-six possible 22 base fragments of SEQ ID NO 82. Thus the invention as a whole was prima facie obvious.

Conclusion

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner(s) should be directed to Richard Schnizer, whose telephone number is 571-272-0762. The examiner can normally be reached Monday through Friday between the hours of 6:00 AM and 3:30. The examiner is off on alternate Fridays, but is sometimes in the office anyway.

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, J. Douglas Schultz, can be reached at (571) 272-0763. The official central fax number is 571-273-8300. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of

Application/Control Number:

10/709,739 Art Unit: 1635 Page 5

document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.

Richard Schnizer, Ph.D.
